

Blackfoot Bingo Instructions

This game will involve some creativity on your part.

- In a classroom, you can laminate the cards so they can be reused over and over.
- Choose how you want the bingo players to “cover their squares.”
- Use Bingo robbers, non-permanent markers, stickers or even buttons
- You decide if the bingo is a straight line, the four corners or the whole card

Ideally, if you have someone who speaks Blackfoot, that person will call out the Blackfoot number and bingo players can “cover” their squares. The caller will want to cover the squares on his/her card as they are called.

If no one speaks Blackfoot, the caller can attempt the pronunciation of the Blackfoot words so the bingo players can place their markers. This should create some laughter.

For extra support, download Ninastako’s APP: **NINASTAKO**, which provides the pronunciation for all the numbers.

Have fun!
